WHAT ARE COMMUNITY COLLABORATIVES?

Complex issues need collaborative solutions. Communities bring all the critical players to the collaboration—service providers, educators, health care professionals, law enforcement, businesses, government agencies, and most importantly, parents and youth. Local communities utilize support to identify gaps in services, develop long-term plans using the latest strategies and data, and coordinate activities. The community collaboration then commits to common goals, measurements, and practices—working as one toward the end goal of improving well-being. To connect to Community Response and Connected Youth Initiative, please contact the Coordinator in your area.
